

A Guide to Sahl Hasheesh

Sahl Hasheesh is a luxurious resort superbly located on an area of 120 000 sqm on the sandy beach of Sahl Hasheesh bay, one of the most famous Red Sea diving spots renowned as the virgin water & land. Sahl Hasheesh bay is 14 kms south to Hurghada airport & 200 kms from Luxor city making the perfect combination of fun & culture.

Sahl Hasheesh (meaning the Green Valley) is a new purpose built resort located near Hurghada, Egypt and is set to be the premium beach front resort along the Red Sea Riviera. The resort occupies a prime beach front bay spanning around 12km of some of the most beautiful and virgin sandy beaches found in Egypt. The project promises to become an Integrated Resort destination of world-class standards.

Arrival Piazza

This is what all visitors entering the main gate are greeted by. The Piazza is a large open space which will be used as a meeting point, with bars and shops and also used for concerts and open air performances. The Piazza is an intricate and detailed structure built in an Arabic style with cascading waterfalls running down to the promenade.

The Promenade

The promenade is an essential part of the resort and was one of the first structures put in place by resort developers. Since most of Hurghada has hotels occupying the beaches and very little opportunity to walk along the sea, ERC put in the promenade along the front, with a restriction to developers so they cannot build on or privatize the beaches. The promenade in place is currently about 8kms long.

Isis Old Town

This will be the centre for entertainment of Sahl Hasheesh, containing shops, bars, restaurants as well as being next to the cinema complex, piazza, pier, and sunken city.

Sunken city

The planners of the resort are building an entire historic city underwater along similar lines to the "lost city of Atlantis." The ruins of the city will be seen underwater, and the concept is a pharonic city that was part of Sahl Hasheesh area, which sank millions of years ago. While walking along the boardwalk, which connects to the pier that extends into the water 250m, one will be able to see the "sunken city" whilst standing on dry land. The main attraction though will be for divers who will want to see the cities' features at close quarters.

Marina

The resort of Sahl Hasheesh has plans to have the largest Marina in the Red Sea, as well as a yacht club. Having a "yacht club" is a little something extra for those people who really love the sea so they can meet with people and enjoy a passion they have. Guests who do not have yachts or boats can still go to lounge at the "yacht club"

Golf

There will up to 5 golf courses in the initial phases of Sahl Hasheesh, with the first two already under construction. This will be the perfect golfers paradise with excellent conditions all year round and excellent, professionally designed courses to match.

Other Facilities planned for the future

- The World - Theatre
- Executive Golf Courses
- Grand Canal

- Central Park
- Polo Club
- Equestrian Centre
- Theme Park
- Botanical Gardens
- Arnold Palmer Signature Stadium Golf (managed by IMG)
- Sea World
- Water Park
- Cinema Complex

Please note that not all the above facilities are in use or open as yet as the resort is still developing.
